TECHNICAL COMPETENCIES

Backend

PHP · Laravel · REST APIs · Authentication and authorization · Business rules · Background processing · Python · FastAPI

Delivery and operations

Linux · Apache · Nginx · Docker · GitHub Actions · CI/CD · Deployment · Rollback and release validation

Databases

MySQL · MariaDB · PostgreSQL · SQL Server

Frontend and supporting

JavaScript · TypeScript · React · Blade · Livewire · HTML · CSS · WordPress · WooCommerce

PROFESSIONAL EXPERIENCE

Some roles overlap because they were full-time, deliverable-based positions with flexible schedules rather than fixed daily working hours. Work was organized independently around agreed responsibilities and deadlines.

Senior PHP Developer / Server Administrator · Niipit IVS, Denmark

December 2016 – Present

Full-time | Flexible, deliverable-based schedule

Develop and operate custom PHP and Laravel applications, legacy business systems, APIs, integrations, e-commerce platforms, and production hosting for an international remote client.

Modernize established PHP systems through controlled, reversible changes while preserving business-critical workflows

Own Linux-based delivery and operations across Apache, Nginx, deployments, maintenance, troubleshooting, and performance work

Support backend development, database integration, technical SEO, WordPress, and WooCommerce according to product requirements

Head of IT · S/N Insurance Broker AD Bitola

November 2018 – January 2025

Full-time | Flexible, deliverable-based schedule

Led application, infrastructure, security, reporting, support, backup, and vendor operations for the insurance broker and five additional companies.

Developed and maintained internal business and reporting workflows backed by SQL Server and MySQL

Implemented data synchronization, system integrations, and operational automation for insurance-related processes

Managed Linux servers, production support, recovery planning, access, and day-to-day technology continuity

Laravel Developer · NicheStack, Czechia

November 2020 – June 2022

Full-time | Flexible, deliverable-based schedule

Delivered remote Laravel development for backend features, internal SEO and marketing automation tools, API integrations, database changes, and production maintenance.

Implemented application features and integrations across Laravel and SQL-backed workflows

Supported production behavior through maintenance, investigation, and incremental improvements

SELECTED ENGINEERING PROJECTS

Razbudise

[Case study](#)

PHP, Laravel, PostgreSQL, Next.js, TypeScript

Editorial workflow and publishing platform with explicit assignments, approval and rejection states, traceable decisions, and draft-only delivery.

BuildIQ

[Case study](#)

Python, FastAPI, PostgreSQL, React, TypeScript

Construction-management product foundation with tenant-aware authorization, subscription enforcement, production gates, and 172 automated backend and frontend tests.

MediaHub

[Case study](#)

PHP, Laravel, React, TypeScript

Movie and television tracking product covering viewing state, discovery, diary, collections, imports, responsive interfaces, and privacy-aware social features.

EARLIER EXPERIENCE

Front-End Developer · Technology Solutions for Business Automation (TSBA)

January 2017 – September 2019

Full-time | Flexible, deliverable-based schedule

Built web and mobile interfaces with HTML, CSS, JavaScript, AngularJS, and Ionic.

Chief Technology Officer · Intel Marketing (WEHOO)

February 2013 – November 2016

Led web development, infrastructure, client implementation, technical delivery, and project coordination.

PHP / Joomla Developer · The Nova Code

November 2012 – February 2013

Developed and maintained PHP/Joomla websites, e-commerce customizations, and HTML/CSS interfaces.

EDUCATION AND TRAINING

IT Academy Alexandria

September 2009 - June 2010

Web Design and Internet Technologies training, including CIW and Adobe web-design certifications.
